

# **Communication and Interaction with Stakeholders**

## Identifying Stakeholders and Material Considerations

In order to facilitate effective communication with various stakeholders, we incorporate the scope and boundaries by referencing the GRI standard. The main steps are as follows:

### Step 1: Identify Stakeholders

The identification of stakeholders is mainly conducted by the Wistron ITS Corporate Sustainability and Social Responsibility Promotion Committee. Our five principles for identifying the criteria for stakeholder engagement include dependency, responsibility, influence, multiple perspectives, and impact. The list of stakeholders is divided into eight groups: clients, employees, shareholders/investment institutions, suppliers, government entities, non-profit organizations/communities, media, and others.

### Step 2: Establish Communication Objectives

Wistron ITS's corporate philosophy is altruism. We uphold the belief that, "Altruism means sustainable self-interest," and our practical actions and reporting are rooted in sustainable coexistence, innovative values, and humanistic concerns.

### Step 3: Collect Sustainability Issues

Based on the consideration of the GRI criterion indicators, we continue to address the issue from previous years. At the same time, we also refer to the sustainability reports published by domestic and overseas benchmark companies and related media reports to analyze industry trends and collect relevant sustainability issues, forming the scope of Wistron ITS's sustainability issues.

### Step 4: Conduct Materiality Analysis and Determine Priorities

Wistron ITS CSR Committee members and internal staff will conduct a questionnaire survey to determine the extent of impact on the company's operations based on economic, environmental, and social considerations for the aforementioned issues. In the end, a total of 20 important considerations will be calculated based on high concern and high impact, which will become the most important substantive issues for communication.

### Step 5: Determine the Scope and Boundary of Material Topics

Based on the ranked 20 critical areas of consideration and based on whether the impacts related to Wistron ITS' activities, services, and relationships occur within or outside the organization, the value chain encompassed by Wistron ITS is presented in its entirety.

### Step 6: Review and Discussion

After a substantial analysis of the findings, the report's editorial board will discuss and decide the priority sustainability issues to be disclosed and communicated to the public.

## Identify the Scope and Boundary of Material Topics

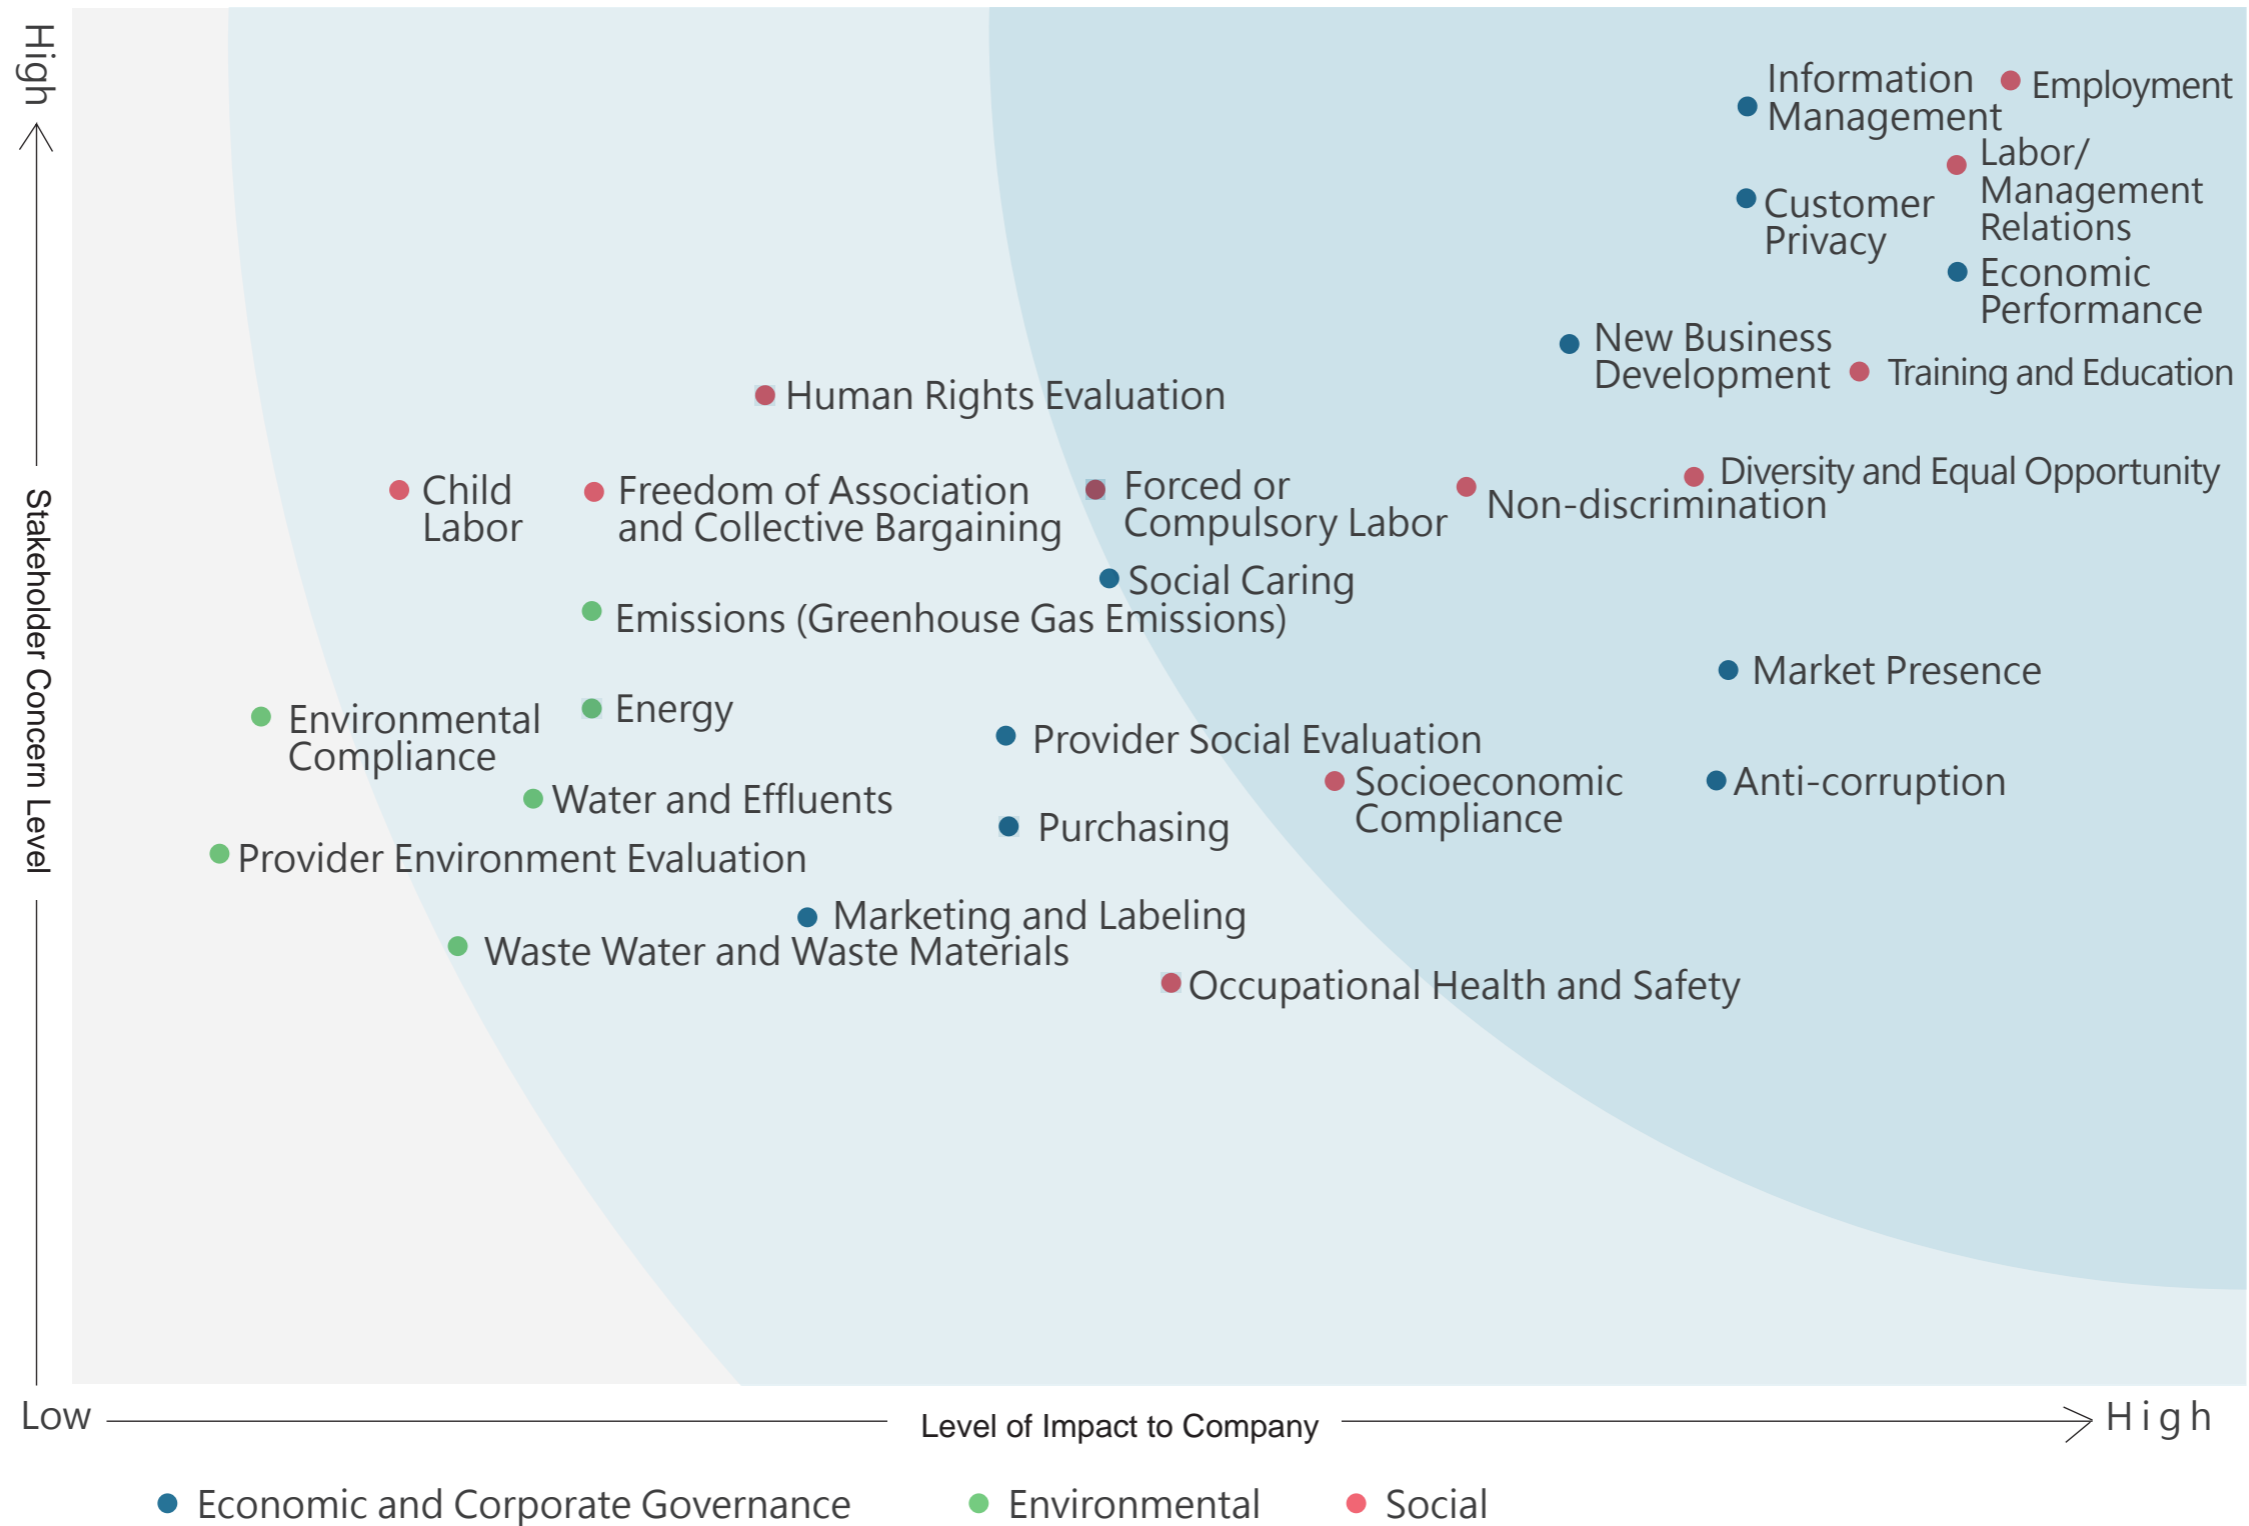

Category	Material Topics	Chapter in 2019 CSR Report	Response to UN Sustainable Development Goals (SDGs)	Boundary		
				Internal	External	
					Supplier/ Contractor	Customer
